ARCHITECTURAL FROM PAGE 38

SOMETIMES LED LAMPS ALL SEEM THE SAME...

HERE IS WHY THE DURALAMP LED LAMPS **ARE NOT** THE SAME AS THE REST

Constancy of colour and uniformity of all the different whites and transversal to the different types of LED lamps and independent of the chip manufacturer.

PLUS: selected inside the McAdam 4 step. PRO and Top remain inside McAdam 2/3 step. An important advantage able to enhance even the most sophisticated lighting projects.

L70 is the indicator of the moment, in terms of hours, in which light flow reaches 70% of the nominal value and identifies the useful life of a lamp or the LED fitting. In order to achieve high L70, DURALAMP engineers its products with maximum attention to the operating temperature and to the quality to the materials in order to achieve always higher useful lifetime, coherently with the electronics feeding the LEDs.

Duralamp's staff manufacturing experience, the Duralamp employees in the manufacturing sites, ensure that the product always conforms with our high quality standards. What specified in the product datasheet, is the product of multiple technical and duration tests. In Duralamp, the technical office is the heart of the company, the guarantor of the product reliability.

DURALAMP OFFERS IMPORTANT SAFEGUARDS ON LED PRODUCTS:

Up to
2 years (4000h/year)*

*4000h = 11h a day x 365 days.
Without limitations on the duration of use for the first year, provided the observance of the installation conditions.

Up to
3 years (4000h/year)*

*4000h = 11h a day x 365 days.
Without limitations on the duration of use for the first year, provided the observance of the installation conditions.

Up to
4 years (4000h/year)*

*4000h = 11h a day x 365 days.
Without limitations on the duration of use for the first year, provided the observance of the installation conditions.

Full Guarantee
4 years (24h/24h)

h24 provides total guarantee!
The winning element for great projects.

Product quality is essential, but sometimes customers are looking for a lot more. Some of them are mostly mindful of the price, others want performance, while at other times, it's durability that convinces them to buy, or the peculiar lighting engineering features that prove a winner and conquer a project. Which is why Duralamp has decided to offer 4 product ranges, to cater to all market tiers.

BASIC Ideal products for markets of consumers who desire a LED product and are seeking the most convenient solution in terms of its cost.

PLUS Articles with outstanding performance and the best quality-price ratio, the best solution for the majority of applications.

PRO Products for specific applications and top-level features, especially appreciable by industry professionals.

TOP High quality products dedicated to specifiers. They enjoy the PROJECT GUARANTEE: performance and durability guaranteed on design specifications.

The specific guarantee that each item enjoys is clearly indicated in the catalog and is subject to compliance to the limitations of use. For details, refer to www.duralamp.it or contact the sales force.

RESIDENTIAL AND HOSPITALITY ENVIRONMENTS

DECO LED

The decorative lamp range is significantly enriched by new power choice, dimming options and, above all, colour temperatures.

DECO LED PRISMA
New "relax", 2200K version and lots of other variants.

DECO LED GLASS
The most similar to an incandescent lamp, all in glass!

DECO LED FLUX PLUS
New 2400K, "relax" color temperature and new dimmable version.

DECO LED A60 200°
New power, new colour temperature... and dimmable version!

DECO LED A60 300°
New dimmable version.

DECO LED UP
New colour temperature: 4000K and 6000K asides from 3000K.

New G9 with 200 lumen emission, very lightweight and very compact.

REFLECT-LED
New range replacing incandescent lamps.

DURADISK LED
Frosted version for use under shelves, cabinets, etc.

Technical data are subject to tolerances and may vary; any update is published on the website www.duralamp.it

DURALED BIPIN G4

- Operating voltage 12V AC/DC.
- Same applications as halogen G4 bulbs, available with side or vertical pins for OEM lamps, and the Prisma version for visible applications.
- Extremely small size: suitable for use in very small fittings, suspensions or many arms chandeliers.
- Very low heat emission.
- Warm white light.
- Instant power on.
- Very low Energy consumption.

► Lifetime at least 20 times longer than incandescent lamps, with obvious reduction in maintenance costs as well as in energy consumption.

USAGE INFORMATION

- Compatible with 12V AC output electromagnetic transformers and with drivers for LEDs and with constant current drivers.
- Do not use with dimmers except where differently indicated.
- Do not use this item with electronic transformers for halogen lamps.
- Can be used with Duralamp power supply for LED Code DELT10A-12.

PRO

DURALED G9

- Working at main, no transformer needed.
- Direct replacement of G9 halogen lamps.
- Pleasant decorative design, suitable also in fittings where the lamp is visible.
- Extremely small size: suitable for use in very small fittings, suspensions or many arms chandeliers.
- Frosted cover for anti-glare effect.
- Absence of heat.
- Warm white light.
- Instant power on.
- Very low Energy consumption.
- ▶ Lifetime at least 14 times longer than incandescent lamps, with obvious reduction in maintenance costs as well as in energy consumption.

LED solutions for any application.

PLUS

DECO LED PRISMA

- Special decorative effect which reminds that of candles.
- The "incandescent lamp" effect is recreated thanks to the reflection of a special polycarbonate lens. Without sacrificing the classic atmosphere, energy saving on branched decorative appliances is ensured.
- Warm light ideal for residential and hospitality environments.
- -90% energy consumption.
- Excellent light emission.
- Ceramic casing housing the electronic components: optimization of heat dissipation and greater safety for the user.
- ▶ Lifetime at least 10 times longer than incandescent lamps, with obvious reduction in maintenance costs as well as in energy consumption.
- Blister pack, single lamp.

OMNI is a lamp with a strong visual impact thanks to its attractive, cutting-edge design; a "balloon" of light floating above a heat-dissipating lamellar structure. This design allows the coloured diffuser to emit 330° warm and perfectly even light. This emission uniformity makes it a state of the art lamp, ideal for use in appliances that are enhanced by the light beam uniformity.

PRO

DECO LED PLUS OMNI DIMMABLE

- ▶ Remote phosphor technology for uniform light flux and an anti-glare diffuser with a very unusual shape: OMNI emits 330° light with extraordinary effects.
- ▶ A true piece of design that can immediately replace incandescent lamps even in open appliances with visible lamps.
- ▶ PLUS OMNI replaces a 60W and 100W incandescent lamp.
- Warm light ideal for residential and hospitality environments.
- -90% energy consumption.
- Excellent colour rendering: >80.
- Anodized steel body with epoxy paint and glossy finish. The special design of the lamp body makes it possible to obtain a wide dissipation surface.
- ▶ Lifetime at least 30 times longer than incandescent lamps, with obvious reduction in maintenance costs as well as in energy consumption.
- ▶ 110V version available upon request.

DURADISK LED

- GX53 LED lamp with visible chips, for a strong visual impact.
- Working from mains, no transformer required.
- Compact and flexible to use: only 2.5 cm thick.
- ▶ Ideal applications: recessed inside shelves of just 2.9 cm, under wall cupboards, walkways, etc..
- ▶ No problems of contact with wood due to the heat (as in the case of dichroic lamps); no transformers to hide.
- ▶ Triple mounting options: surface, flush recessed, semi-recessed.
- ▶ Finishing bezels available.
- Fuse for mains protection.
- Working position: universal.
- Working Temperature: -25 +40°C.
- Extra Long Life.
- Do not use with dimmers.

PAR56 LED COLOUR CHANGER - 12Vac

- Screw terminals.
- Operating Voltage: 12V, 50Hz (electromagnetic transformer).
- ▶ For external and underwater applications inside suitable fittings.
- Plastic and aluminum body. Equipped with a silicon gasket to ensure perfect adhesion to the watertight device.
- ▶ White or coloured light: static or dynamic emission of a colour sequence.
- Working position: universal.
- Working Temperature: -25 +40°C.
- ▶ Can be used as a retrofit to traditional PAR56.
- The lamp can be adjusted to 22 different colour settings. The lamp, as well as the color sequences, can be turned on and off from the lamp's normal on/off switch (each double click of the switch corresponds to a change), or it is possible to use a small, elegant radio remote control.
- The radio remote control needs an externally positioned receiver (out of the water) to control the lamps.
- For swimmingpools, fountains and external applications.
- Max depth underwater: 1.0 mtr.

Receiver and remote control for LED PAR56

- One remote control can activate several receivers, for example, the receiver for the swimming pool or park lights, or it can be used to open the gate, awnings, etc.
- 4 lamps distributed on two parallel outlets can be connected to each receiver.
- The maximum distance between the remote control and the receiver is 80-100 meters in free air conditions without obstructions.
- The remote control works with a 3V CR2032 type lithium battery which is provided.
- The remote control and receiver are available with separate codes.

For outdoor and under water use.

PRO

LED DE S - Dichroic Reflector Effect

8W!

- Employing LED high power LED.
- Warm colour temperature.
- Mains and extra low voltage versions.
- Fuse for mains protection.
- Working position: universal.
- ▶ LED DE is particularly appreciated for the dichroic effect of the reflector. It is then a LED lamp that looks like a halogen dichroic!
- ▶ GU10 base version: working at mains, no transformer needed.
- ▶ GU5,3 base: operating voltage 12V DC/AC.

▶ Perfect for immediately replacing dichroic lamps where powered by an electromagnetic transformer.

USAGE INFORMATION

- Compatible with 12V AC output electromagnetic transformers and with constant voltage drivers for LEDs.
- Do not use this item with electronic transformers for halogen lamps.
- Can be used with Duralamp power supply for LED, please see specific indications at the relevant page.
- Do not use with dimmer (except where differently specified).

MATRIX

- Using high efficiency last generation LED.
- This powerful lamp can replace a 50W halogen bulb with energy savings of over 80%.
- Mains and extra low voltage versions.
- Polycarbonate optics with a diffused surface for a smooth effect.
- Fuse for mains protection.
- Working position: universal.
- Working temperature: -25° +40°C.
- Aluminium body.
- Unique design of the heat sink improves the efficiency of heat dissipation.

► Perfect for immediately replacing dichroic lamps where powered by an electromagnetic transformer.

USAGE INFORMATION

- Compatible with 12V AC output electromagnetic transformers and with drivers for LEDs.
- Can be used with transformers for halogen lamps.
- MR16 12V: usable with dimmer as shown on the site.
- Can be used with Duralamp power supply for LED, please see specific indications at the relevant page.
- The full list of compatible transformers is available at www.duralamp.it

MATRIX CTA-DIM - Color Temperature Adjustable Dimming

- CTA-DIM technology perfectly emulates the color tones of halogens; when dimmed it gradually transforms a bright soft tone color, at its highest colour temperature, to a warm flame colour tone at its lowest temperature. (2700K to 1600K CCT). Exactly as it used to happen with halogen or incandescent lamps.

CTA-DIM dim it and it changes color temperature as low as 1600K, very cozy!

DR111 LED REFLECTOR ADV

- Using High Power SHARP LEDs.
- Mains and extra low voltage versions.
- Warm white colour temperature.
- Extremely high color rendering: Ra>80.
- Fuse for mains protection.
- Working position: universal.
- Unique design of the heat sink: improves the efficiency of heat dissipation.
- ▶ Reflector Effect: coverage of the light source makes these lamps similar to traditional halogen sources they are intended to replace.
- ▶ The special source position, opposite to the reflector, ensures the anti-glare effect and perfect diffusion of the light beam, with no grey areas.
- ▶ This item is the perfect solution for application in museums, art galleries and top shop windows thanks to high colour rendering and the absence of infrared or ultraviolet light emission.

- ▶ GU10 base version: working at mains, no transformer needed.
- ▶ G53 base: operating voltage 12V DC/AC.

USAGE INFORMATION

- Compatible with 12V AC output electromagnetic transformers and with drivers for LEDs.
- 12V Version: do not use with dimmers.
- Can be used with electronic transformers for halogen lamps.
- Can be used with Duralamp power supply for LED, please see specific indications at the relevant page.
- Maximum load should not exceed 55% of the rated power of the transformer.
- 220-240V 10W version: can be used with TRIAC dimmers.
- Can be used with TRIAC dimmers.

RECESSED RINGS AND ACCESSORIES

- Universal recessed rings.
- 30° adjustable recessed rings on a vertical surface.
- They can be used for all LED lamps with 50 mm diameter. (MR16 and similar models).
- They can be used also with LED Modules.
- Equipped with false ceiling hooking springs.
- Aluminium die-cast body. Fast lamp replacement without using tools and disassembling the appliance.
- Lamp holder and cable clamp not included: see separate kit in the table.

LAMPS AND FITTINGS FOR PROJECTS

TUBOLED 80.000h
The lifetime of these high-performance tubes has been improved to L70=50.000h. Also available in the cold light temperature version, 6000K.

TUBOLED GLASS
The G13 LED tube is becoming increasingly indistinguishable from traditional fluorescent lamps. With an emission at 300°, the effect of the light is enhanced in the ceiling light equipped with reflector.

2200K FOR DURASTRIP IP20
A very warm color temperature to meet the needs of those projects where a particularly relaxing atmosphere is required and you do not want to use color filters.

DURASTRIP RGB+WHITE
Four channel DuraStrip to create a white light with a nuance of colour or to soften the colours created by RGB. IP68.

ARCHITECTURAL PROFILES
New profiles in "invisible" polycarbonate and new profiles in aluminum: more installation possibilities are made available.

new

SPECIAL FOR PROJECTS

From today DURASTRIP can be ordered "to measure". Check details inside.

RTF walk-on
Wide beam, 60°, for this recessed lamp characterised by mechanical resistance and IP67.

RTF 3
The small version. Shares the same finishing as the 15W to 25W versions: a completion of the range that enables the project to achieve excellent uniformity.

SLIMFLUX
The SLIMFLUX is refreshed with improved emission and improved industrialization: SLIMFLUX is now more appealing than ever!

PANTH-LED
The 100W version delivers even more: 8500 lumens emission and well distributed light.

LIGHT TUBES: THE SOLUTION FOR SMALL AND LARGE SPACES

Installations that use fluorescent tubes for general lighting are extremely popular. In Europe, the standard powder fluorescent tubes have been replaced by the more efficient triphosphor tubes. Today, the LED tubes provide an interesting alternative to the triphosphor ones. As they are more reliable, they can replace the fluorescent tubes; they reduce maintenance costs of the system, thanks to longer periods between re-lamping interventions. Moreover, they are the most innovative product able to meet improving and modernization requirements of installations (also the existing ones), ensuring energy saving and compatible development (mercury free).

APPLICATIONS:

GENERAL LIGHTING

Corridors, offices, supermarkets, shops, public buildings, warehouses, hospitals etc...

ACCENT LIGHTING

cove lighting, emphasizing of architectural or furnishing details.

TUBOLED 80.000h

Important improvement in the performance for the TUBOLED 80.000h: L70 has been increased to 50,000h! A major plus in commercial installations, for more extended re-lamping times. The chart shows the maintenance curve of the luminous flux after 50.000h (L70) and after 80.000h (L50) of operation.

TUBOLED GLASS 25.000h

TUBOLED range with 25,000h lifetime: excellent performance and colour rendering with great attention to the optimisation of costs. Body in glass, not orientable. Single hangable pack.

BASIC

TUBOLED GLASS

- LED tubes completely enveloped in glass.
- Wide lighting distribution curve.
- Color rendering > 80.
- Operating voltage 220-240V.
- Working position: universal.
- ▶ Replacing 18W and 36W T8 tubes: high energy saving.
- ▶ Immediate switch on, no flickering or buzzes.

▶ Great flux maintenance.

USAGE INFORMATION

- Do not use with dimmers.
- In case fluorescent tubes must be replaced, follow the simple assembly instructions indicated below. See next page or mounting instruction on the website.
- Do not use in installations in series.

TUBOLED GLASS

TUBOLED GLASS:
A NEW BASIC
AND RETROFIT RANGE!

* Specific guarantee of the LED products: see start of catalogue or consult the site

Technical data are subject to tolerances and may vary, any update is published on the website www.duralamp.it

TUBOLED GLASS is the ideal substitute for the fluo tubes inserted in fittings with reflector. Thanks to the broad emission it is able to take the maximum advantage of the optics present thereby also maximising savings.

TUBOLED 80.000h

- Base: G13.
- Operating voltage 100-240V.
- Working position: universal.
- Aluminium luminaire and polycarbonate screen: with pleasant external aspect, ideal for visible applications.
- ▶ Replacing 18W, 36W and 58W T8 tubes: high energy saving.
- ▶ Immediate switch on, no flickering or buzzes.
- ▶ Excellent uniformity of emission due to the opal screen.
- ▶ Great flow maintenance.
- ▶ IP20.
- Do not use with dimmers.
- In case fluorescent tubes must be replaced, follow the simple assembly instructions indicated below.
- Do not use in installations in series.

FLUORESCENT TUBES!

REPLACING FLUORESCENT TUBES IN EXISTING SYSTEMS TUBOLED GLASS AND TUBOLED 80.000h MOUNTING:

- Existing luminaires equipped with electromagnetic reactor:
 - equipped with thermal protection: direct replacement of the tube + replace the starter with the supplied device/starter
 - Without thermal protection: disconnection from power supply is recommended. Mains feed without any starter.
 - If the fixture is equipped with one reactor which feeding two tubes, exclude the reactor and feed the tubes directly to the mains.
 - Existing luminaires equipped with electronic power supply: disconnect power supply; do not use any starter. Mains feed.
 - FOR USE WITH MAINS SUPPLY 230V, WITHOUT POWER SUPPLY:
 - Connect the pin side "INPUT" indicated on the tube to the mains.
 - Do not connect anything on the opposite side; do not use any starter.
- DO NOT USE IN "IN SERIES" INSTALLATIONS.
- Installation with fluorescent tubes connected in series: the LED tubes can not be connected in series.
 - Clear power supply and the starter of each fluorescent tube; connect LED tubes in parallel directly to the mains voltage.

Pay special attention to the appliance modification on technical-regulatory aspects.

DURASTRIP is a LED strip made with SMD technology, intended to have the best use flexibility. Thanks to the important luminous emission, DURASTRIP can be used in projects where a linear and even LED lighting must be provided, to highlight the architectural components and reliefs of the ambient. Ideal for indoors and outdoors and also immersed thanks to the IP68 protection rating.

APPLICATIONS:

ACCENT LIGHTING

cove lighting, emphasizing architectural or furnishing details.

FUNCTIONAL LIGHTING

under-shelf/under-cabinet, wardrobe interior lighting.

GENERAL LIGHTING

hallways, bathrooms, path marking, etc...

DURASTRIP

- ▶ Packaged in 5 m rolls.
- ▶ Excellent luminous efficiency and an emission able to replace fluorescence in most applications, with the additional benefit of versatility.
- DURASTRIP IP68: Silicone coating can also be used under water and is ideal to follow curvilinear profiles.
- Durastrip IP20, only for indoor use.
- Choice of colour temperatures. Other temperatures and power outputs available on request.
- Resistance to oxidation and fading due to other light sources.
- Extreme long life and absence of maintenance.
- Absence of UV emission.
- Ease of assembly: it can be fixed with the 3M® double-sided tape, the strip is provided with, or with fixing bridges.
- Cut to size: cut to size, every 3 LED for 12V strips; every 6 LED for 24V strips; the 170W version can be cut every 12 LED.
- Package complete of accessories for mounting.
- Max length for single power supply: 5mt.
- Do not use this item with electronic transformers for halogen lamps.
- It is recommended the use of LEDs power suppliers shown in the table.
- Additional cut and mount kit for excluding 170W IP68 and IP20 Strip: 8 end caps, 4 fixing bridges, 4 transparent connectors.

Torre di Pisa - Italy: Targetti project with DuraStrip

DUAL CIRCUIT: AVOIDING VOLTAGE GAP

We redesigned the circuits of our LED strips introducing a technology to double the track, this is already visible on the 2200K IP20 strip. The double track above and below the circuit provides an improvement of the heat dissipation, halves the current on each power supply circuit and resets the minimum voltage drops while standardizing the flow over the entire length of the strip. To ensure reliability of the product always higher.

NEW EFFICIENCY

Doubled the number of LEDs, decreased the power of the single LED, together with the use of double-track circuits: here is how coming DURASTRIP will emit 30% more light! The effect of this change is already visible on DURASTRIP 2200K IP20: 820 lumens per meter!

PERCEPTION OF COLORS: THE PERFECT SPECTRUM

The colors do not exist unless they are shown in a light that contains them in its spectrum. The same color is perceived in a totally different way depending on the source that illuminates it. Not only according to the color temperature, the kind of source and its Colour Rendering, but most of all according to the spectral distribution of the source. The concept of Color Rendering is rendered obsolete by the ability to make the choice on the spectrum of a source. DURALAMP is now able to offer exactly the spectrum that the lighting designer wants, to exhibit the goods or artworks or any environment at its best! Recreate with LEDs the same spectrum of an incandescent lamp - or even metal halide, etc ... - it means to optimally affect the perception of the environment.

CUT FOR YOU!

The DURASTRIP can now also be ordered "to measure". Duralamp offers an interesting customised service to those working on new or renovations projects. We supply DuraStrip LED following the design specifications, already cut to size and, if necessary, with the length of the cables suitable for every ambiance. For faster installation and a perfect service.

BUT WHAT SIZES?

Exactly the size that you need! Let's presume that in your lighting project for a hotel there are 45 rooms with dimensions of 4x4 m, with a strip on one side only; then there are 45 bathrooms with dimensions of 1.80x1.20m with the strip on the long side. We will supply exactly 45 IP20 stripes in 4 metre rolls, complete wiring of the length necessary for the project, plus 45 IP68 strips in 1.8m rolls. PERFECT!

Cut step every 10cm to a maximum length of 7 metres, for DURASTRIP max 10W/m or 5m for DURASTRIP max. 15W/m. The customised cable can have a maximum length of 7 meters.

MULTIPLE COLOUR SELECTION!

The DURASTRIP can be ordered "to measure", including with regard to the colour of the light! Very warm or very cold white, a mix of colours, individual colours.

WHITE

IP20: 2200K - 2400K - 2700K - 3000K - 3500K - 4000K - 6000K

IP68: 2400K - 3000K - 5000K

"PURE" COLOURS

DURASTRIP single colour but in the colour that counts: red, green, blue (RGB) and blends of these colours also mixed with white.

COLOR MIX

various colors can be used on the same strip: for example, 40 cm of red color light and then 40cm of white color light repeated over the whole extension of the strip.

Please consult the Florence headquarters to confirm the quantity and design specifications to order DURASTRIP:

- Cut to size
- With the wiring of the desired lengths
- With the desired color temperatures or spectra

3000K

4000K

5000K

6000K

- UL compliant DURASTRIP are conceived for the large project prescriptors in the countries where the UL mark is required.
- The distinguishing feature is the high luminous output, that along with excellent color rendering make DURASTRIP the product of choice in projects with specific lighting requirements.
- DURASTRIP offer a wide variety of choice for both outdoor and indoor installations.
- The design options becomes almost... endless if you think that virtually any color temperature the designer might wish to have is feasible: just ask!
- IP20 standard substrate: for indoor installations.
- IP65: silicone sleeved strip, suitable to damp locations.
- IP66: full silicone jacket coated strip, suitable to wet locations.
- Color consistency: within 2-step MacAdam ellipse deviation from LED sub-bin selection +/- 50K.
- Complete with secure 3M™ adhesive peel and stick backing for effortless installation.
- Compatible dimming with MLV, ELV, 0-10V, Triac dimming protocol control products.
- A choice of polycarbonate or aluminum mounting channels and accessories are available.
- DURASTRIP is available in rolls of 5 meters length but can be pre-assembled to specific lengths with various connector options for project requirements and efficient power configuration.

WHITES

Energy Efficient LED flexible linear light strip for continuous consistent color in linear applications. Extremely flexible and adjustable lengths for varied architectural applications.

PVX TUNABLE

PVX LED tunable flexible light strip for variable white color tuning allows the freedom to choose any warm white color temperature from 2200K-3000K or any cool white color temperature from 3000-6500K.

PURE COLOR

Monochromatic static LED light strip emits saturated pure color for various color effects for niche, cove and linear architectural details.

RGB

Energy Efficient RGB LED flexible linear light strip for continuous color changing RGB and RGB-W effects for linear applications. Extremely flexible and adjustable lengths for varied architectural applications.

PRO **CTC TOTAL WHITE**

- CTC Total White allows you to choose the white "colour" and change it at any time from warm to cold.
- IP68.
- It can be interfaced with home automation systems for managing colour temperature.
- Use DALI ZKCDA, DMX ZKCDMX or ZKCDMX-R to vary the Total White colour temperature continuously and obtain all intermediate temperatures. It can be used also with light sensors.

DURASTRIP CTC Total White IP68

Code	Watt	Volt	Lumen	K	Beam	N° LED	L	L1	L2	Barcode	Icon

DURALUM MODULES

- Flexible system of continuous LED modules mounted into multiple arrays; supplied by the meter, it can be cut to any length between the modules.
- Each array can be bent horizontally up to 90° and 45° vertically from the next module for complex cove and niches applications.
- Each LED PCB incorporates aim adjustability with +/- 60° rotation from vertical in order to attain a perfect control of the direction of the light.
- DURALUM comes with a wide choice of color temperatures: 2200K - 2400K - 2700K - 3000K - 3500K - 4000K
- Color consistency: within 2-step MacAdam ellipse deviation from LED sub-bin selection +/- 50K
- Each module carries a PCB with 6 LED array (PCB can be replaced).
- DURALUM modules strand can be surface mounted with their optional mounting clips.
- Max continuous run: powered at 24Vdc, 4 amp max, max 225 modules.
- DURALUM can be dimmed like all other DURASTRIPS: see the relevant accessories pages.
- DURALUM accessories include: straight mounting channel with different covers (clear or frosted), Jbox, mounting clips, end caps, antidust removable cover and spare replacement LED modules and empty strand.
- DURALUM is available upon orders with minimum quantity to be defined with the sales force. Standard length is 122cm (48").

Color temperatures

Neutral to warm white color applications for coves, reverse linear trims/niches, toe kick and cabinetry illumination.

WALL TOUCH DIMMER

- Dimmers for DURASTRIP white, for DURASTRIP CTC, DURASTRIP RGB and RGB+white.
- External interface in tempered glass with high touch sensibility, immediate response to touch and control precision.
- 4 zones can be controlled separately or synchronised.
- Conforms with protocol DMX512(1990).
- Can be used with ZKCDMX, ZKCDMX-R, ZKCDMXW.
- Dimmer's driver included in the box (220-240Vac / 5Vdc).
- Easy installation and intuitive use.

WALL TOUCH DIMMER FOR WHITE LIGHT DURASTRIP

	Code	Input voltage	Number of DMX channels	Number of areas	Number of scenes	Photo	L1	L2	L3	Barcode	
new	ZKTPC-DIM	5V _{dc}	4	4	4	1	86	86	10	80119058 39635	1

- Each channel can have 256 levels of light variation and 4 favourite scenes can be saved.
- "Memory" function: the last colour temperature chosen is recalled when the light is switched back on again; 3 scenes can be saved.

- "Memory" function: the last colour level chosen is recalled when the light is switched back on; 4 favourite scenes can be saved.
- Simultaneous or synchronous control of the RGB colours and white. 36 setting modes.

DMX Diagram

CONTROL INTERFACE THAT CAN BE USED WITH DURASTRIP

Dimming and control systems can be used to improve the ambient aspect: they help creating special, different, soft and always lively atmospheres. Moreover, they have an important function of energy saving: by varying the emission and/or

activating/deactivating the system or appliances, they allow optimising the presence of solar lighting.

DALI CONTROLLER FOR DURASTRIP WITH WHITE LIGHT

Code	Max current (A)	Volt OUT	Volt IN	Connection	IP	L1	L2	L3	Barcode 80119058	
ZKCDA	2x5	12-24V _{dc}	12-24V _{dc}	screw	20	168	51	35	33367	1 -

■ 2-channel controller, which can be also used with Durastrip CTC Total White.

1-10V CONTROLLER FOR DURASTRIP WITH WHITE LIGHT

Code	Max current (A)	Volt OUT	Volt IN	Connection	IP	L1	L2	L3	Barcode 80119058	
ZKC1-10	10	12-24V _{dc}	12-24V _{dc}	screw	20	168	51	23	33374	1 -

■ It can be used with all White light Durastrips, except for CTC Total White.

DMX CONTROLLER FOR DURASTRIP RGB (OR WHITE ON 3 CHANNELS)

Code	Max current (A)	Volt OUT	Volt IN	Connection	IP	L1	L2	L3	Barcode 80119058	
ZKCDMX	6/CH	12-24V _{dc}	12-24V _{dc}	screw	20	168	51	23	33442	1 -
ZKCDMX-R*	5/CH	12-24V _{dc}	12-24V _{dc}	RJ45/screw	20	178	42	33	36795	1 -

■ It can be used with all Durastrip RGB, CTC and white.

* Version with RJ45 connector, which can be used in a traditional way or with remote control included in the package.

DMX 4 CHANNELS CONTROLLER FOR DURASTRIP RGB+WHITE (OR 4 CHANNELS)

	Code	Max current (A)	Volt OUT	Volt IN	Connection	IP	L1	L2	L3	Barcode 80119058	
new	ZKCDMXW	5/CH	12-24V _{dc}	12-24V _{dc}	screw	20	168	51	22	38942	1 -

■ Can be used with Durastrip RGB+white.

■ Connection diagrams are available at www.duralamp.it (in the product datasheet).

DMX INTERFACE

DMX512, which abbreviation is DMX (Digital MultipleX), is a communication protocol mainly used to control lighting (even LED type), from computers or control units. It is normally used to control coloured lighted or white lighted appliances (RGB) with variable temperature. Thanks to the high transmission speed of the data, the DMX allows making dynamic and even complex sceneries.

A DMX network consists in 512 channels; the number of appliances that can be controlled cannot be defined beforehand, as it depends on how many DMX channels each appliance uses. E.g., if every appliance of the DMX network uses 3 DMX channels, the network can contain 170 appliances.

ZKCDMX-R code version: Equipped with RJ45 connector for DMX signal, complete with looping system and remote sensor with plug (20 cm cable). It can be used in a traditional way or with remote control included in the packaging (signal distance 10 mt in free air).

1-10V DIMMING INTERFACE

The 1-10V luminous intensity control system runs with analog technology: 1 corresponds to 0% and 10 to 100% of the lamp emission. The intensity can be adjusted by using the linear curve or logarithmic curve and it is the simplest system to install. The connection is carried out by 2 polarity wires placed between the power supply and controller. It can be used with active or passive control systems.

DALI INTERFACE

The DALI (Digital Addressable Lighting Interface) is a digital protocol interfacing with the power supplies. It is widely used in the lighting field as it provides visible benefits compared to the 1-10V analog control technology (it is essentially a flexible, digital control that allows addressing the single appliances). The DALI protocol allows defining appliance units and managing the lighting sceneries, to create the right lighting of an ambient according to its use. Different lighting sceneries can be configured and enabled using a simple key, without involving the system wiring. The DALI protocol is more simple and economic compared to the integrated management systems of a building (building management). A DALI network can control up to 64 appliances/lamps.

How to use DURASTRIP with our controllers? Here the indications of maximum power.	DURASTRIP 12V _{dc}		DURASTRIP 24V _{dc}	
	ZKCDA	2x60W		2x120W
	ZKC1-10	120W		240W
	ZKCDMX	72W/CH		144W/CH
	ZKCDMX-R / ZKCDMXW	60W/CH		120W/CH

POLYCARBONATE PROFILES WITHOUT RIM FOR DURASTRIP IP20

- Polycarbonate profiles with optional cover in transparent or frosted polycarbonate.
- The cover fits on the base eliminating any side rim for an extremely clean, luminous effect.

SEAMLESS PROFILES FOR DURASTRIP IP20

	Code	Description	L	Barcode 80119058		
new	07UICPMC8	"BASE" profile in transparent polycarbonate with mounting holes (2 pcs)	1220	39918	4	-
new	07UIWP45C8	White polycarbonate profile for 45° mounting (2 pcs)	1220	39932	4	-
new	07UICPC8	Transparent cover for base profile or 45° profile (2 pcs)	1220	39925	4	-

Transparent polycarbonate BASE profile for surface or recessed mounting. It can be completed with the cover in transparent or frosted polycarbonate (frosted upon order). For DuraStrip IP20. L=1220 mm x 2 pcs (8ft)

Mounting example with transparent cover.

White polycarbonate profile for surfaces mounting with emission of light from inclined plane at 45°. It can be completed with the cover in transparent or frosted polycarbonate (frosted upon order). For DuraStrip IP20. L=1220 mm x 2 pcs (8ft)

Mounting example with transparent cover.

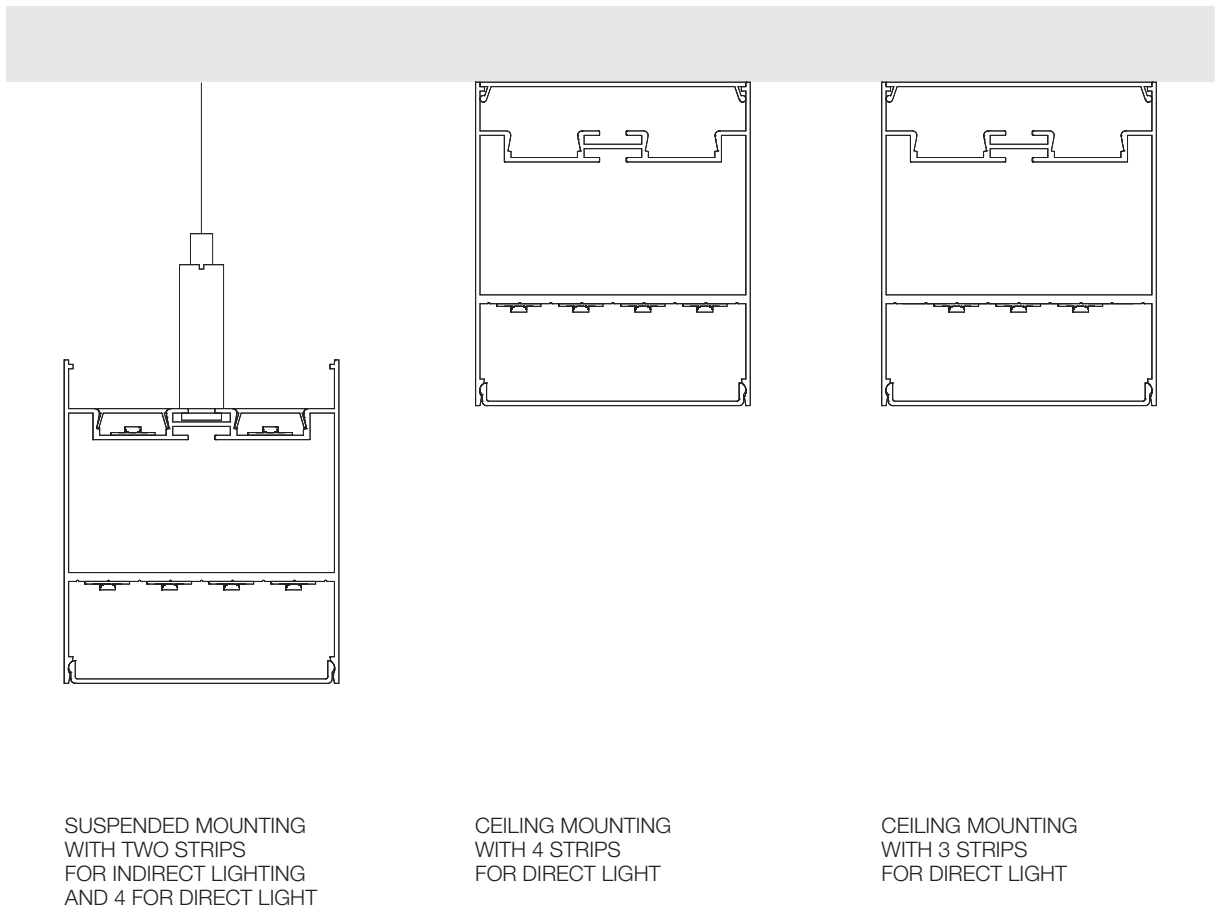

DURAPROFILE PLUS DOUBLE EMISSION ARCHITECTURAL PROFILE

- Linear architectural profile configurable in direct, indirect emission or both, for high levels of light emission.
- The direct emission is configurable with the use of 1 to 4 strips; indirect emission foresees two strips.
- Mounting: on ceiling for unidirectional or suspended for unidirectional or double emission.
- The aluminium profile is completed, depending on the application chosen, with screens (flat front and rear pair of screens for indirect emission), side closure caps and suspension kit.
- For ceiling mounting the rear support is required, code PRDESO-SL, on which the profile can be attached.
- Compartment inside the profile suitable for the insertion of the power supply and dimmer.
- Possibility of on/off switching and dimming separate for direct and indirect lighting.

UNIDIRECTIONAL OR DOUBLE EMISSION: WORK WITH THE COLOURS OF THE LIGHT

Can be used with DURASTRIP CTC with synchronous control of the colour temperature of the two emissions.

Interesting use of DURAPROFILE PLUS to achieve different lighting areas through the use of DURASTRIP appropriately positioned and handled by the controllers. Using white and RGB DURASTRIP allows you to mix colours and, for example, obtain the colour saturations required in special applications such as food or retail.

Profile with dual side emission.
Surface mounting.
Aluminium support with side covers in opal polycarbonate.
Rear support to be fixed to the surfaces:
the profile is attached to the said support.
The main body of the profile can accommodate the driver (ZK7360). The profile includes two closure caps.
Order cutting kit code comprising two closure caps,
Cod. KTDEAP
Profile L= 1220 mm

Profile with dome screen.
Surface mounting.
Aluminium support to complete with cover in opal polycarbonate.
Back support to be fixed to the surface:
the profile is attached to the said support.
The main body of the profile can accommodate the wiring connection. The profile includes two closure caps.
Order cutting kit code comprising two closure caps,
Cod. KTDSAP
Profile L= 1220 mm

Profile with dome screen mount 45°.
Aluminium support to complete with cover in opal polycarbonate.
Back support to be fixed to the surface:
the profile is attached to the said support.
The profile includes two closure caps.
Order cutting kit code comprising two closure caps,
Cod. KTDSAN
Profile L= 1220 mm

DURASTRIP PROFILES

- Extruded aluminium profiles for DURASTRIP.
- They allow for a more stable installation, in the event of linear profiles.
- Recommended for outdoor applications.

PROFILE STRIP IP20 **ANTI DROP**

Prevents water and moisture from entering by extending the useful life of the LED strip.

MODULO LED DE DICHOIC EFFECT

- ▶ LED Modulo: can be used in existing recessed fixtures, as a replacement of a halogen dichroic lamp.
- Using high power CREE LEDs.
- ▶ Wired module equipped with connection to the specific power supply. It is then a LED lamp that looks like a halogen dichroic!
- ▶ Significant energy savings compared to the use of halogen lamps in a system with many lights.
- Opening beam: flood, 38°.
- Warm white light.
- Aluminium body.

- Working temperature: -15 +40°C.
- Ensure the fixture used to house the Modulo is suitably ventilated.
- The code refers to packaging containing the module and its driver: see the ring codes below.

USAGE INFORMATION

- The Module can be equipped with recessed rings. Each ring meets a specific requirement: IP20 adjustable recessed fitting, fixed recessed fitting with IP65, complete with front screen.

RTF DOWNLIGHT

- LED source integrated in downlight luminaires.
- Mains voltage operation.
- ▶ Same diameters of fluorescent, halogen or incandescent lamps' downlights: immediate replacement of the pre-existing holes.
- ▶ Well diffused light output, ideal for the general lighting of the ambient.
- Aluminium finned dissipation luminaire.
- Electric connection to free terminals.
- Quick connection system to the false ceiling using springs.
- RTF 10W, 15W and 25W: upper electrical connection; it can be moved by placing the power supply next to the appliance.
- Working Temperature: -20°C +40°C.
- White ring except where otherwise specified.

SLIMFLUX PANELS

- Ultra flat LED appliances for direct lighting; thickness: 9 mm.
- Same flow as the 4x18W module with fluorescent tubes.
- The catoptric system is used to obtain a special light reflection and excellent luminance uniformity over the entire panel and lighted surfaces.
- Side heat dissipation.
- Mounting possibilities: recessed, suspended (with suspension wire accessory), on the ceiling/wall (with surface mounting accessory).
- ▶ Immediate switch-on.
- ▶ Maintenance-free.
- Color tonality Natural white.
- Extremely high color rendering: Ra>80.
- Fuse for mains protection.
- Working position: universal.
- White painted metal body.
- ▶ Adjustable suspension wires kit available with separate kit.
- ▶ Remote power supply included.
- ▶ Do not use with dimmer.

UGR19

UGR19 The European Standard for lighting work places (EN 12464-1) assesses and defines the ideal glare values to protect workers. A UGR value is required for every type of environment and application.

A UGR19 is required for places where visual display units are used. Slimflux UGR19 checks the reflected glare, specifically on video terminals, limiting the incidence of the luminous beam. For improved quality of the work and of peoples' life.

UGR = Unified Glare Rating

STANDBY EMERGENCY

SLIMFLUX can be used with emergency kit for standby lighting, see driver's page.

DIMMING ***

SLIMFLUX can be used with multi-current multi-voltage dimming power supply, see driver's page.

PANTH-LED

- LED projector for outdoor, indoor and construction sites' applications.
- Grey painted die-cast metal body.
- Compact dimensions: Easy to use and to handle.
- IP65.
- Equipped with fixing bracket, adjustable on the vertical axis.
- Free wire for professional uses.
- It can be connected to motion or twilight sensors.
- Working temperature: -20° +40°C.
- Free wire terminals.
- Connected with motion or twilight sensors.
- Class 1 fittings.

GENERAL CONDITIONS

1. Applicability

1.1 These general conditions (hereafter the “**Conditions**”) constitute an integral and essential part of the contract of sale between the Parties. The Conditions shall regulate all legal relationships between Duralamp S.p.A. (hereafter “**Duralamp**”) and the purchaser (hereafter the “**Purchaser**”) where the said relationships are not disciplined by the applicable terms of the Italian Civil Code (C.C.). The nullity of any of the terms of these Conditions shall not prejudice the validity of the remaining Conditions or the Contract.

1.2 Any changes to these Conditions shall be agreed between the Parties in writing, with the exception of the provisions set down in article 1341 of the Italian C.C..

2. Sales

2.1 Sale requests for the products (hereafter the “**Products**”) shall be accepted “*subject to the seller's approval*” and shall be considered to be irrevocable in accordance with and as an effect of article 1329 of the C.C. for a period of 1 (one) month from the date of the order requesting execution without prior acknowledgement, pursuant to and as an effect of article 1327 of the C.C. from the date on which the order is received by Duralamp.

2.2 The Products detailed in the individual orders and the relevant accessories shall be supplied to the Purchaser by Duralamp with “*Retention of Title*” pursuant to and as an effect of articles 1523-1526 of the Italian C.C. In this case, the transfer of ownership of the Products to the Purchaser shall take place exclusively upon the full payment of the price agreed, whilst any risks shall be the responsibility of the Purchaser from the moment of delivery of the Products.

2.3 Whilst confirming the terms stated above, the Parties hereby agree that should the Products and relevant accessories be destroyed for causes not attributable to Duralamp, the Purchaser shall not be released from the obligation to pay for the same, even where the Products have not yet been delivered.

3. Prices

3.1 The prices detailed on the price list shall be applied to Product sales orders. The aforementioned prices shall be unit prices per single item, except where stated otherwise for certain Products. The Parties shall have the right to agree, in writing, any derogations and/or special conditions of sale.

3.2 Moreover, the Parties hereby agree that the following conditions shall be applied:
(I) Minimum order: € 250 (two hundred and fifty) for Italy - € 750 (seven hundred and fifty) for other countries;
(II) Delivery free to destination in Italy for orders of € 250 (two hundred and fifty) or more;
(III) Ex-Works deliveries for other countries.

3.3 The prices given above do not include VAT and installation costs.

3.4 The prices provided in this catalogue shall be valid until a new price list is published.

4. Currency

All prices are given in Euros (exclusive of VAT). Invoices shall be drawn up in Euros.

5. Special requests

Products can be supplied to the Purchaser in non-standard colours and with special features. The relevant price, minimum quantities per order, methods and timing of deliveries shall be agreed in each individual case, in relation to the reference order.

6. Transport

6.1 Duralamp shall not be liable for any damage and/or losses which may occur during the transportation of the Products, unless the Products are delivered free at destination.

6.2 Duralamp shall have the right to establish the method of transportation to be used for the Products, unless the Parties have previously established a method of transport in writing.

6.3 Upon delivery, the Purchaser shall undertake to verify the condition of the products and shall make any complaints directly to the carrier and/or conduct any actions necessary in the event of loss, misplacement, removal or damage, or delays in transportation and/or the methods of delivery of the Products.

7. Complaints

7.1 In the event that the Products are found to have any faults and/or defects, the Purchaser shall undertake to notify Duralamp of the same in writing, by means of a registered letter, no later than 8 (eight) days following the discovery of the said faults and/or defects, at the risk of invalidating the obligations of the guarantee provided by Duralamp. In this case, the faulty Products, which should be reported within the terms established, should be returned to Duralamp, once the Purchaser has received specific permission to do so in writing.

7.2 In the event that the Purchaser's complaints are held to be valid, Duralamp, at its complete discretion, may make the necessary repairs and/or replace the Products, excluding the attribution of any further charges, obligations, indemnification or compensation to the same. The Products in question should be returned to the Duralamp S.p.A. plant in Campi Bisenzio, Italy, Via Di Limite no. 148. In the event that, following an inspection by Duralamp, the Products returned by the Purchaser are not found to be faulty and/or defective, Duralamp shall return the Products to the Purchaser, charging the same an amount equal to 15% (fifteen percent) of the value of the said Products.

8. Delivery

8.1 The Parties hereby agree that the terms established for the delivery of the Products shall not be considered absolute or essential and that, in any case, each term shall be exclusively in favour of Duralamp, unless otherwise agreed in writing

between the Parties.

8.2 In the event of delayed delivery, once 15 (fifteen) days have passed since the agreed date, the Purchaser may send Duralamp written warning to complete the delivery within a further term of no more than 15 (fifteen) days from receipt of the same. In the event that Duralamp has not completed the delivery within this further term, the Purchaser may withdraw from the order with regard to the Products that have not yet been delivered. In this case the Purchaser shall only be obliged to pay Duralamp for the Products actually delivered, excluding the payment of any further indemnification and/or compensation to the Purchaser.

8.3 Duralamp shall not be responsible for any other breaches, including the failure to deliver or delayed delivery of the Products, caused by events outside its reasonable control such as, purely by way of an example and not limited to the same: the failure to deliver or delayed delivery of manufacturing materials by Duralamp's suppliers, equipment breakdowns, strikes and other trade union action, electricity blackouts, suspension of or difficulties with transportation.

9. Payment

9.1 The price due shall be paid by the Purchaser according to the conditions and modalities set down in the order and, in any case, by means of payments made exclusively to “DURALAMP S.P.A.”.

9.2 Duralamp shall only recognize the validity of the payments when the same are made in compliance with the provisions of article 9.1 above. This means that amounts paid using any other method shall not be considered to be a payment in discharge of the Purchaser's obligations. The eventual acceptance by Duralamp of a bank draft or other trade bill shall only occur with the application of the proviso “*under usual reserve*”.

9.3 In the event of delayed payment with respect to the terms agreed, the Parties hereby agree that bank interest shall be due to Duralamp at the current PRIME RATE increased by 3 points. Interest shall be applied as of right, with no obligation for Duralamp to send the Purchaser a formal notice to pay.

9.4 Moreover, in the event of a delay in payment of more than 15 (fifteen) days, Duralamp shall have the right to terminate the order as of right pursuant to article 1456 C.C., sending written notification of the same, barring compensation for any damage.

9.5 In the event that the Parties have agreed upon a method of payment by instalments for the Products, the failure to pay several instalments or just one instalment exceeding one eighth of the overall price of the Products, shall result in the loss of the Purchaser's right to pay in instalments and shall give Duralamp the right to request the remaining balance of the price or, alternatively, at its own discretion, to terminate the contract with immediate return of the Products and the acquisition of the instalments paid, as indemnification, barring the right to compensation for any damage sustained.

10. Guarantee

10.1 The Products provided by Duralamp shall be guaranteed for a period of 12 (twelve) months from the date of delivery against any manufacturing or material defects and/or faults and against any breakdowns not attributable to the Purchaser. Duralamp's only obligation and the Purchaser's right with regard to claims related to the guarantee shall be limited, as decided by Duralamp, to the replacement or repair of the defective or non-compliant product or the reimbursement of the price for the purchase of another product. Duralamp shall be granted a reasonable amount of time to repair or replace the product, or to make the previously authorized reimbursement.

Any defective or non-compliant Products shall become the property of Duralamp as soon as they have been replaced or reimbursed.

10.2 The guarantee shall exclude any failures due to circumstances beyond the control of Duralamp (lightning, flooding, etc.), as well as any damage caused by the improper use of the Products and/or relevant accessories. Notwithstanding the above, Duralamp shall not be bound by the guarantee if the contested defects or non-compliances have occurred as a result of submitting the Products to resistance or environmental tests, the incorrect use of the same, or in the event that the use of or conditions of use of the Products is different from that indicated in the instructions and technical information, as a result of negligence, incorrect installation or accident, or if they derive from improper repairs, alterations, modifications, storage or transportation or by incorrect handling.

10.3 The Purchaser shall send the Products returned in accordance with the terms of the guarantee to the place indicated by Duralamp in compliance with the Duralamp policy regarding authorization to return materials in force at the time. In the event that the Products returned are found to be compliant or not faulty, the Purchaser shall pay the cost of returning the same as well as the cost of insuring, inspecting and handling the Products.

10.4 LED products Enjoy specific guarantees: details are published on www.duralamp.it

11. Limitation of Liability

11.1 WITH THE SOLE EXCLUSION OF CRIMINAL INTENT AND GROSS NEGLIGENCE, DURALAMP SHALL NOT BE LIABLE FOR LOSS OF PROFITS OR SAVINGS, LOSS OF REPUTATION OR GOODWILL, ANY DIRECT, INDIRECT, CONSEQUENTIAL OR SPECIAL DAMAGE THAT MAY DERIVE FROM OR BE CONNECTED TO THE CONTRACT OR SALE OF PRODUCTS OR SERVICES BY DURALAMP OR BY THE USE OF THE SAME OF A CONTRACTUAL OR EXTRA-CONTRACTUAL NATURE OR DERIVING FROM ANY OTHER SOURCE, EVEN WHERE DURALAMP HAS BEEN NOTIFIED OF OR IS AWARE OF THE POSSIBILITY OF SUCH DAMAGE.

11.2 The limitations and exclusions stated in article 11 shall apply within the limits permitted by law.

12. Applicable law and place of jurisdiction

12.1 These Conditions and all the effects of the same shall be governed by Italian law. The Parties hereby agree that any disputes related to these Conditions shall refer to Italian jurisdiction to the exclusion of all others.

12.2 The exclusive place of jurisdiction shall be the registered offices of Duralamp S.p.A., with the express exclusion of any other competing places of jurisdiction.

LED CATALOG n° 4
(1st of February 2015)

© Copyright 2015 - Duralamp SpA

All data and pictures provided in this catalogue are for reference only: since they might change during mass production, they have to be considered nominal values with tolerances. Duralamp SpA reserves the right to modify its products in any moment, for technical or commercial reasons.

- Product description.
- ▶ Technical and commercial information.
- Usage information.

Note

Available on order: the message "Available on order" often appears in the catalogue. We've added it to offer our customers the broadest choice option. Careful though: if an article is available "on order", it means that it is not readily available in stock and only minimum quantities are available for purchase. We therefore recommend that you contact sales for further details.

Legend

Packaging quantity: please respect packaging quantity in order to speed up order processing and guarantee a better protection of goods.
